I like reading fantasy books, because they are special and different. I still remember the day when I started reading these kind of books. It was in High School when my teacher told the class to read the Harry Potter books She only asked for the first one, but after that book I couldn't stop reading all the collection.

First of all, fantasy books are based on fiction so you have to think more about them, and our imagination flies. Secondly, it is a good way of disconnecting with everyday problems. However it is true the fact that other kind of books are nice too. Finally I prefer fantasy books because they are different of our normal life that is sometimes very boring. It is wonderful when you discover that you can have fun with a book.

To sum up, reading is a very good activity for all the people and it is also very important, so we have to read, I recommend fantasy and science-fiction books.

Question 5

En este ejercicio se propone una solución, pero no es la única posible

It is difficult to know if one day online learning will substitute traditional education, but it has a lot of advantages.

First of all, you can wake up when you want, and you organize your own timetable, so you are free to do other things. Secondly, you can follow your rhythm and go slower or faster depending on your level. However, it is true the fact that a teacher always help a lot with the doubts and maybe being at home you don't understand the same way as in person. Finally if you study at home you will save a lot of money because you don't need to take the public transport.

In conclusion, online learning has a lot of advantages but we don't know if it will substitute the normal or presential education because the contact with someone who can resolve your doubts it would be the worst part.
